PROFESSIONAL SUMMARY

Computer Science & Business Systems student with strong foundations in Python, problem solving, and generative AI. Passionate about building AI-powered educational applications and creating engaging learning experiences through technology. Experienced in hackathons, collaborative projects, and peer teaching.

EDUCATION

Visvesvaraya Technological University (VTU), Belagavi

Expected Graduation: 2029

B.E. in Computer Science & Business Systems (CSBS) — Semester 1 | CGPA: 8.95/10

Y.B. Annigeri PU Science & Commerce College

Class XII (2nd PUC), Science & Commerce — 89.5%

RELEVANT COURSEWORK

- Programming Fundamentals
- Mathematics
- Problem Solving
- Data Structures (in progress)

TECHNICAL SKILLS

Languages: C, Python

AI & Prompting: Prompt Engineering, ChatGPT, Gemini, OpenAI API (learning), Firebase (learning)

Web & Frameworks: HTML, GitHub Pages

Developer Tools: VS Code, GitHub

Productivity Tools: Microsoft Word, Excel, PowerPoint

PROJECTS

Mindful Haven | HTML, GitHub Pages

the-nidhi-bhat.github.io/Mind-Haven | github.com/the-nidhi-bhat/Mind-Haven

- Designed and built a mental wellness platform blending emotionally supportive content with an intuitive, calming user experience for students.
- Created mood tracking, journaling, guided breathing, and study-planning features focused on making self-care approachable and non-clinical.

Sky Predict (Weather App) | HTML, Weather API, GitHub Pages

the-nidhi-bhat.github.io/SKY-PREDICT-JARVIS | github.com/the-nidhi-bhat/SKY-PREDICT-JARVIS

- Built a weather forecasting application for NASA Space Apps Challenge 2025, translating complex weather data into a simple, user-friendly interface.
- Collaborated with a team on design and functionality under hackathon time constraints.

AI PROMPT ENGINEERING (INDEPENDENT PRACTICE)

- Sample prompt: "Act as a children's educational content writer. Create a 3-minute animated video script for children aged 6-8 explaining the water cycle, with simple language, fun characters, and a short quiz at the end."
- Practice includes turning vague prompts into structured ones (age group, length, tone, moral) and comparing outputs across AI tools.

TEACHING EXPERIENCE

- Assisted 15+ classmates with programming and mathematics concepts through peer tutoring, explaining core coding and math concepts in an accessible, step-by-step manner.
- Tutored 5+ younger siblings and cousins in academics, mathematics, and computer basics.

CERTIFICATIONS

- upGrad — Generative AI Foundations
- AWS — Fundamentals of ML & AI
- Google Cloud Skill Badges
- HackerRank — Python (Basic)
- HP LIFE — AI for Beginners, Data Science & Analytics, Cybersecurity Awareness, Critical Thinking in the AI Era

HACKATHONS & TECHNICAL EVENTS

- NASA Space Apps Challenge 2025 — Participant
- Google DevFest Belgaum 2025 — Participant
- Build with AI — Google Developer Groups
- Hack With India — Vibe Hacks 2.0 (Top 1000 among 3000 teams)

POSITIONS OF RESPONSIBILITY

- Volunteer, Firewall — Smart India Hackathon (October 2025)

SOFT SKILLS

Communication • Patience • Teamwork • Problem Solving • Leadership • Adaptability • Empathy • Presentation Skills

LANGUAGES & INTERESTS

Languages: English, Hindi, Kannada

Interests: Teaching, Mathematics, Artificial Intelligence, Problem Solving, Coding Challenges
